3. RESPONSE: TAT was tasked by EPA to develop and implement a QASP for the collection of air and soil samples for asbestos analysis from the residential area in Bellefontaine Neighbors, Missouri, adjacent to the former CertainTeed/GAF manufacturing sites and Maline Creek. This area was affected by flooding in 1993 and it was believed that asbestos contamination may have been spread in floodwaters. TAT drafted the QASP as specified and submitted the draft to EPA/EP&R for review, however prior to approval of the QASP the EPA/EP&R role with this site diminished due to involvement by other agencies.
